

III. Specification Amendments

(On page 1, line 3, please amend the paragraph as follows:)

Related Applications

This application is related to PCT/US2003/025358 filed August 13, 2003 which claims priority to provisional application number 60/403,201 filed on August 13, 2002, titled Novel Compositions and Processes for Delivering an Additive, and provisional application number 60/433,677 filed on December 16, 2002, titled Novel Compositions and Processes for Delivering an Additive.

(On page 14, ¶ beginning on line 5, please make the following amendments:)

Exemplary pharmaceuticals include, but are not limited to, ivermectin, fenbendazole, piperazine, magnesium hydroxide, stranzole, furosemide, penicillin, amoxicillin, prednisolone, methylprednisolone, acepromazine, aspirin, PROZAC, ZANTACS, BENADRYL, praziquantel, pyrantel, HOE 120739, Sumitomo Chemicals-1638, Nitenpyram, spinosad and omeyprazole.

(On page 17, ¶ beginning on line 21, please make the following amendments:)

The dough is then formed into a soft chew of the present invention by a knockout. In an embodiment, the dough is formed while still warm. The dough may be formed into a soft chew by any means or method common in the art, such as by hand or by machine. In an embodiment, a forming machine or patty machine is utilized, such that the soft chew is formed out of the dough. Suitable examples of forming machines are exemplified in U.S. Pat. Nos. 5,165,218, 4,780,931, 4,523,520, and 3,887,964. A most preferred forming machine is the FORMAX

machine manufactured by FORMAX Food Machines, Mokena, Illinois.
